Internship

TimesPro (Online)

(1 month)

- Building a Complete CI/CD Pipeline for a Simple Web Application(Flask Calculator)

Projects

Library Management System (Spring Boot, MySQL, Angular)

Developed a full-stack Library Management System using Spring Boot, Angular, and MySQL to manage books, users, and borrow/return operations. Integrated RESTful APIs for seamless communication between the frontend and backend, providing an efficient and user-friendly library management experience.

Hostel Management System (Advanced Java, JSP, MySQL)

Developed a web-based Hostel Management System using Advanced Java, JSP, and MySQL to manage student records, room allocation, and hostel details. The application provides an efficient and user-friendly interface for handling hostel operations. Created a web app for managing hostel records, room allocation, and student details.

Achievement

- Successfully completed GeeksforGeeks Java + DSA Program ‘
- SAP Certified – Back-End Developer (ABAP Cloud)
- SAP Certified Associate – Business Process Integration with SAP S/4HANA
